

Vatsal Omar

Marketing Automation Developer

vatsalomar1@gmail.com | +91 9696139141 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

Full-stack developer with experience building scalable notification systems, workflow automation, and real-time data pipelines. Designed agentic workflows for targeted messaging at BLive and developed multi-model consensus engines for dynamic decision-making. Strong foundation in CRM integrations, multi-channel communication, and cloud infrastructure.

EDUCATION

Birla Institute of Technology and Science (BITS), Pilani

2023-08 – 2026-07

Bachelor of Science in Computer Science — Pilani, IN

EXPERIENCE

Software Development Intern

2024-12 – 2025-09

BLive — Bangalore, IN

- Designed multi-channel notification workflows using Firebase Cloud Messaging and Python backend to deliver targeted alerts (SOS, delivery updates) with sub-second latency to operator roles
- Built real-time telematics data pipeline processing IoT streams from connected devices, enabling dynamic anomaly detection and alert routing for fleet management
- Implemented CRM-like RBAC system with NestJS + PostgreSQL + JWT Auth to manage permissions across 4 enterprise clients (Zomato, TVS, Ather, Bounce)
- Integrated geospatial tracking with Google Maps API for real-time fleet visibility, supporting route optimization and location-based campaign triggering

PROJECTS

StrategyVault — AI Trading Strategy Marketplace

FastAPI · Next.js 14 · Redis · PostgreSQL · Gemini 2.0

Full-stack platform using multi-model LLM consensus engine to generate and validate trading strategies, with sandboxed execution and validation frameworks

- Built multi-model consensus engine (Gemini, OpenAI, Claude) to generate BUY/HOLD/REJECT verdicts with confidence scoring for automated decision-making
- Engineered validation framework with walk-forward analysis, Monte Carlo simulation, and market regime detection to prevent overfitting in automated systems

AcordLayer — Self-Hosted Collaboration Platform

Go · TypeScript · React · PostgreSQL · WebSockets

Privacy-focused platform with real-time messaging, workflow automation, and containerized deployment for team collaboration

- Architected workflow automation layer with no-code triggers and Docker Compose deployments for scalable team workflows
- Built real-time messaging system with WebSocket-based communication for low-latency team collaboration

ACHIEVEMENTS

Intern of the Quarter — BLive — Recognized for technical excellence in building notification systems and RBAC frameworks across enterprise fleet management platforms

Top 8 — OpenEnv AI Hackathon — Ranked top 8/70,000+ developers in India's largest AI hackathon (Meta × Hugging Face × PyTorch)

TECHNICAL SKILLS

Languages: TypeScript · Python · Go · JavaScript · SQL

Frontend: React · Next.js · Tailwind CSS

Backend: FastAPI · NestJS · PostgreSQL · Redis · Firebase

Workflow Automation: Workflow automation · Multi-model LLM integration · Real-time data pipelines · RBAC systems

Cloud Infra: Google Cloud Platform (GCP) · Docker · CI/CD · REST APIs
